Tiemco Hooks, the foremost in fly hooks.

Tiemco's advanced method has revolutionized the design and manufacture of fly hooks. Tiemco has become the world-wide leader by introducing new hook styles that let flies more life-like and by pioneering new manufacturing processes, such as chemical sharpening that improve hook performance. Each year we add new hook designs, extending the range of our hooks to meet the expanding needs of innovative fly tyers. Each Tiemco hook style is designed specifically to satisfy the most demanding customers in the world: the fly tyers who depend on Tiemco hooks.

Tiemco fly hooks are made with fly fishing in mind. And since a sharp, strong hook may be the single most important component in your fly fishing gear, we believe it makes perfect sense to choose the best hooks in the world. Think Tiemco!

TMC Hook Chart

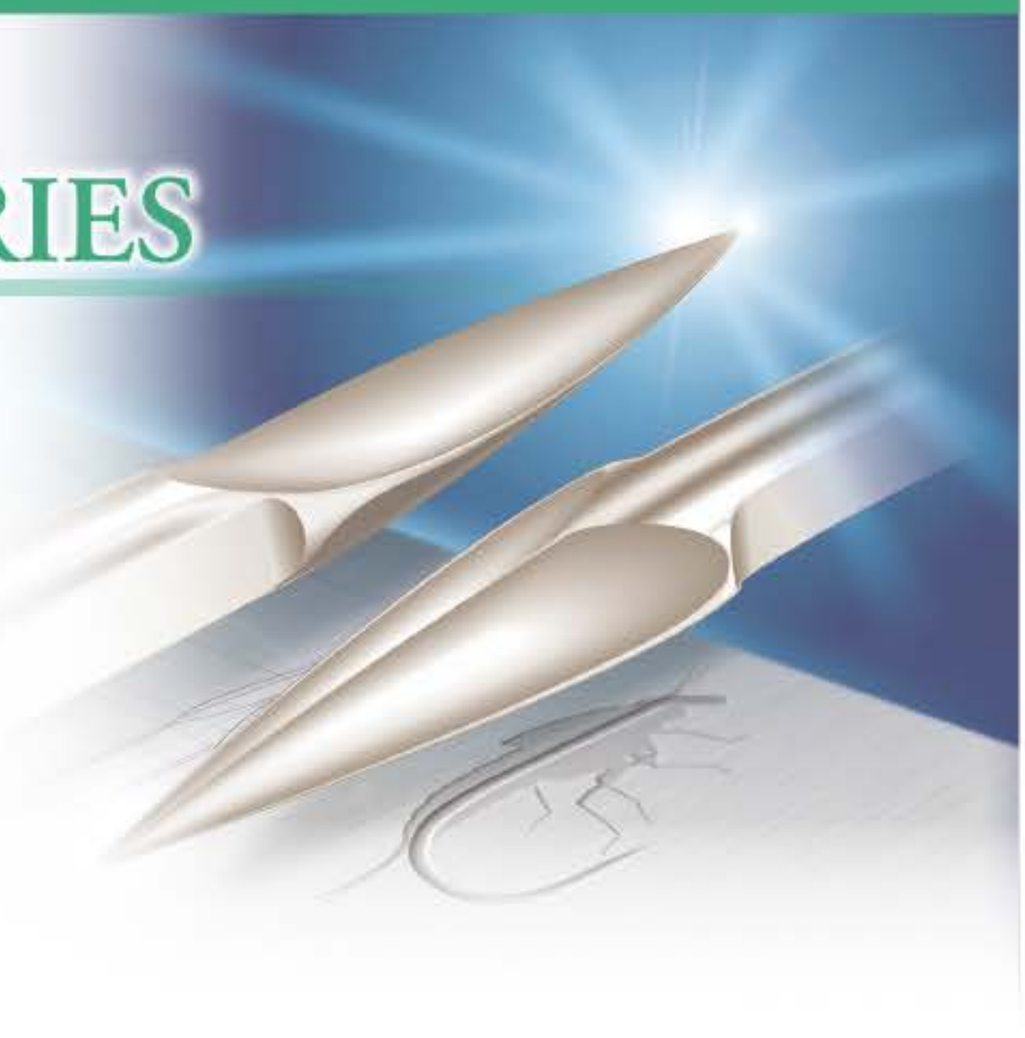

Exacting detail in every Tiemco Hook.

The Japanese, long known for its mastery in precision steel blades, are revolutionizing modern-day fish hooks. Tiemco Ltd. have combined their talents for top quality and dependable service to usher in a whole new era in fly fishing history. This fact has surfaced through the many new manufacturers of chemically sharpened hooks. Though no one can compare we feel "immitation is the greatest form of flattery."

And you should compare. No one else offers such a wide array of unique designs. Proven styles which are second to none. And the best news is the total commitment to quality at affordable prices.

We promise once you have tried them, you'll be hooked.

TMC SP POINT SERIES

The Tiemco SP Series features a hollowed curve point with triangulated edges that sharpen easily. The “slow-tapered” point lowers the resistance of penetration, resulting in accelerated hook sets and better holding ability, especially in barbless versions. Biologically speaking, when a hook pierces a fish's mouth in a flash, the wound will be constricted. The basal part of the point has “apron” on both sides. These tiny swelling will work as barb to some degree. In larger sizes, they also help streamer flies track better in the water by functioning like the keel of a ship.

Barbless

SPR
Round Point

TMC100SP-BL

SPS-BL point, Dry fly, 0X~1XH, 1.5XW, D/E, Forged,Bronze.

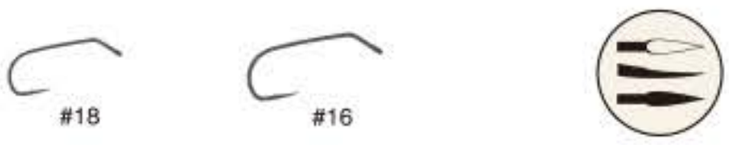

This hook features the SPS-Barbless point(SP with a straight point) and heavier wire than TMC100. Strong enough for big fish. We expect that this new barbless dry fly hook will be good for any dryfly fishing around the world and be a new global standard.

TMC108SP-BL

"Dolphin Shank" Dry fly, Emerger, Nymph, 0.5XL, 0.5XF, SPS-BL point, ST/E, Bronze.

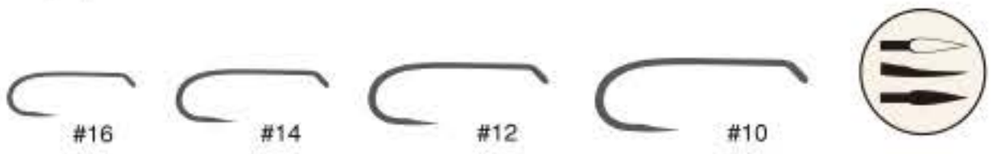

This hook has a very unique bent shank called 'Dolphin Shank'. It can imitate a floating nymph as it truly is hanging in a shallow angle in the surface. This is also good to tie extended-body patterns. Try them with Shimazaki Hollow Body Tool, Burner and Material Kit. You can tie realistic extended body flies with them.

TMC3761SP-BL

SPS-BL point, 1XL, 2X Heavy, D/E,Sproat bend, Bronze.

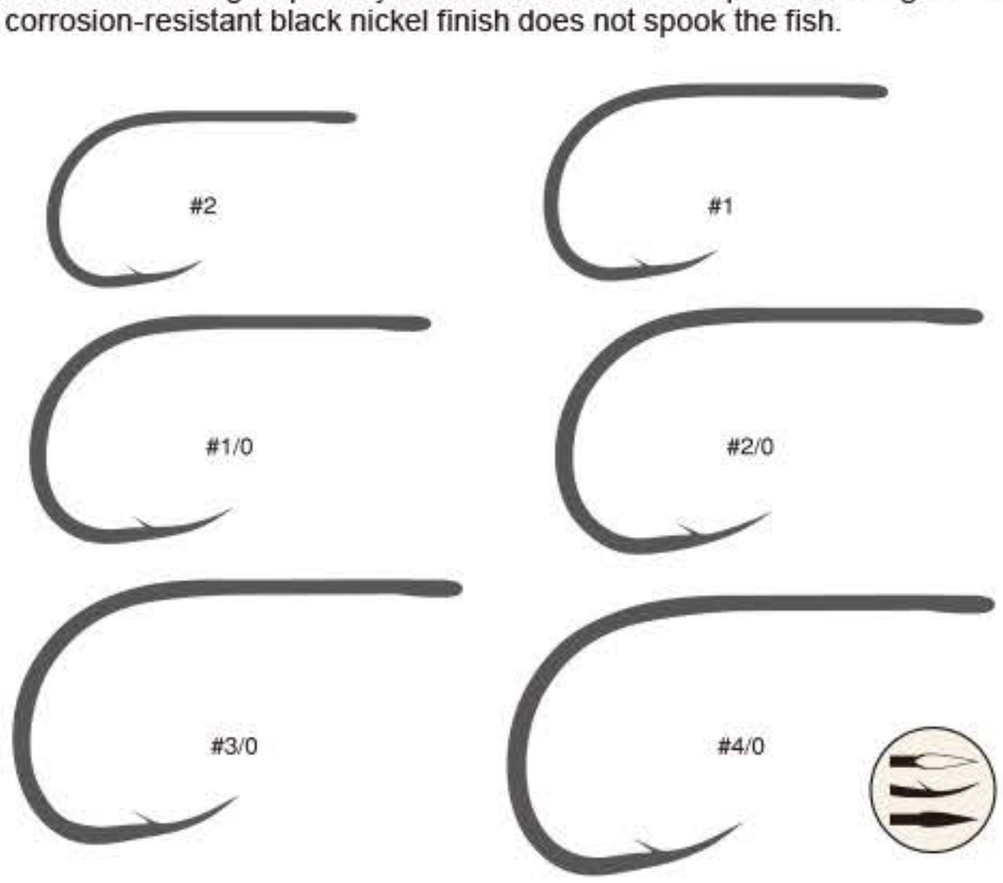

Same design as TMC3761, but with SP point. With its 1X long and SP hook design, this hook should be a standard for every fly tyer's selection of nymph hooks.

TMC600SP

SPR point, 3XH, 2XS, 3XW, ST/E, Forged,Black-nickel.

This is the latest style of big game hook features SP point. Eyes of each size are considered to be large enough to accommodate shock tippets. Made from high quality carbon steel for superb strength. A corrosion-resistant black nickel finish does not spook the fish.

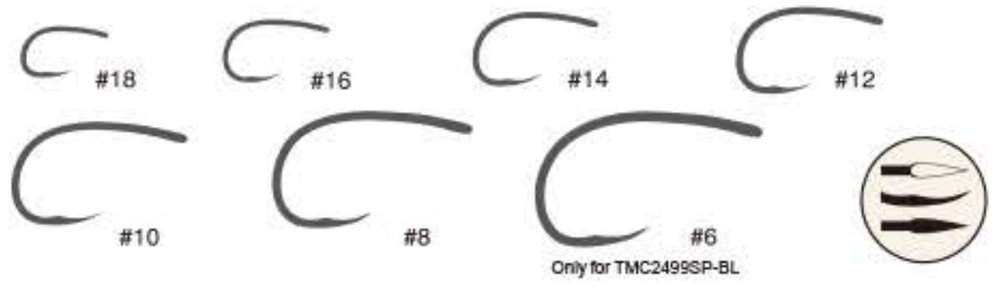

TMC2499SP-BL

SPR-BL point, 2XH, 2XS, 3XW, ST/E, Forged, Bronze.

TMC2499SP-BLB

SPR-BL point, 2XH, 2XS, 3XW, ST/E, Forged, Black.

Designed based on TMC2488 but with 2X heavy wire for added strength as on TMC2457.SPR-Barbless point(round point).Great for emergers, pupae & larva, shrmps, eggs etc.Popular in Europe for Check-nymphs.

TMC FLY HOOK SERIES

TMC100

Dry Fly, D/E, 1XF, Wide gape, Forged, Bronze.

TMC100B

Dry Fly, D/E, 1XF, Wide gape, Forged, Black.

TMC100BL

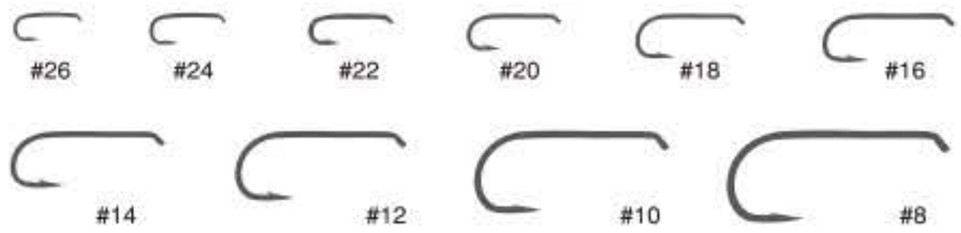

Dry Fly, D/E, 1XF, Wide gape, Forged, Barbless, Bronze.

TMC101

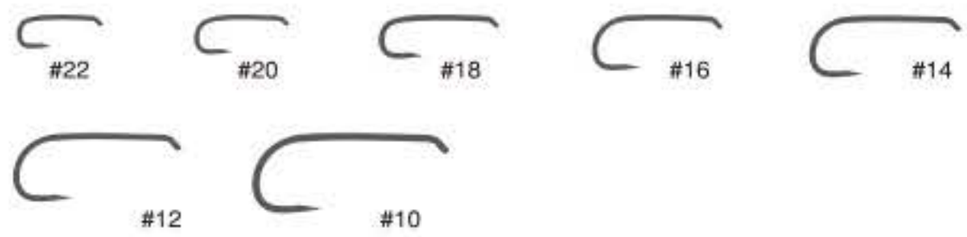

Dry Fly, Straight eye, 1XF, Wide gape, Forged, Bronze.

Tiemco's standard dry fly hook. Its slightly wider gape and increased wire strength in smaller sizes makes it the most popular all-purpose hook for dry fly work. The barbless model has a longer hook point for the same secure hooking and holding as the barbed model. TMC101 is for anglers who prefer a straight-eye hook, TMC 101 incorporates all of the other features of the popular TMC 100. The TMC100B is black-finished for more severe situations.

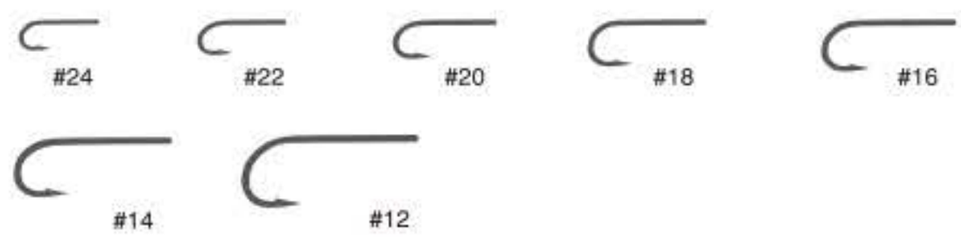

TMC100・TMC100B (#8~20)

TMC100BL

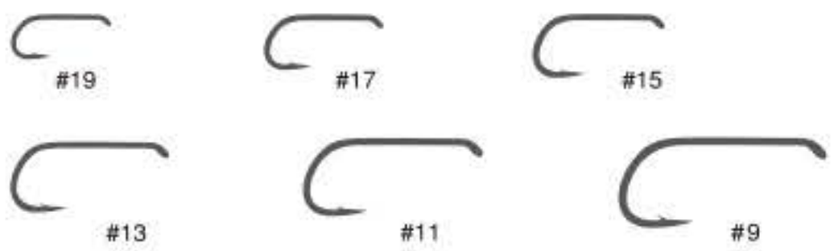

TMC101

TMC102Y

Dry Fly, D/E, 1XF, Wide gape, Forged, Black.

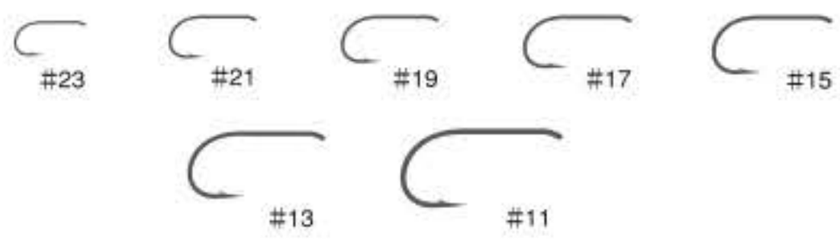

Originally designed as a solution for the "quick take" strikes of Japanese native trout,TMC 102Y has become a standard hook for tying parachute-style patterns. The point has moved back slightly for more secure hooking. Black finish, odd sizes and down-eye only.

TMC112Y

Dry Fly, D/E, 4XF, 2XW, 2.5XS, Forged, Black-nickel.

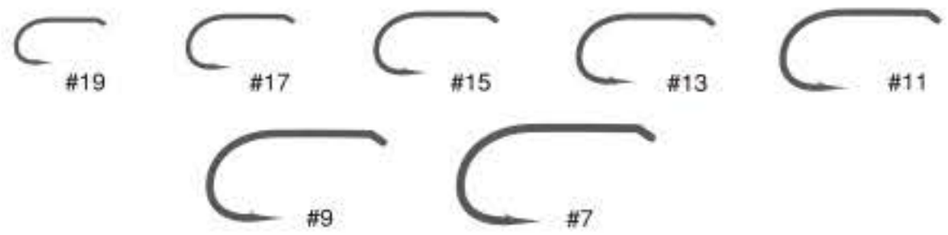

Specifically designed for very selective trout like Japanese Yamame. ('Y' in the model name stands for Yamame as well as on TMC102Y.) The latest straight, short shank hook with super fine wire for delicate dry flies like parachute dun and thorax patterns.

TMC112TR

Dry Fly, D/E, 1XF, 2.5XS, 2XW, Bronze.

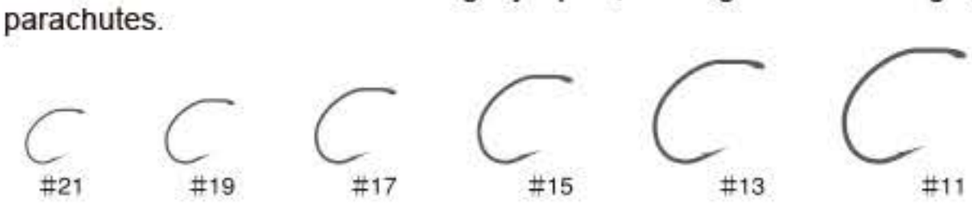

The heavier wire version of TMC112Y for big trouts. The size 7 and 9 are good for big insects and beetles. Same 1X fine wire with our standard TMC100.

TMC212Y

Dry Fly, D/E, 4XS, 5XW, Forged, Black-nickel.

Specifically designed for very selective trout like Japanese Yamame. ('Y' in the model name stands for Yamame as well as on TMC102Y.) The latest curved shank hook with a very wide gape for dry flies hanging on the surface. Good for floating nymphs, emergers and hanging parachutes.

TMC212TR

Dry Fly, D/E, 1XF, 4XS, 5XW, Forged, Bronze.

The heavier wire version of TMC212Y for big trouts. The size 9 is great for big mayflies and beetles. Same 1X fine wire with our standard TMC100.

TMC508

Midge dry & Tiny emerger, D/E, 3XF, Variable wide gape/short shank, Micro barb, Bronze.

This hook is designed especially for modern midge patterns tied with today's advanced synthetic and natural materials in mind. This hook has wide gape and long point to insure more secure hooking and holding. The short shank minimize the fly silhouette, and the fine wire makes it much lighter. An ideal hook for tiny dry flies.

TMC921

Dry Fly, D/E, 2X Short, 1X Fine, Forged, Bronze.

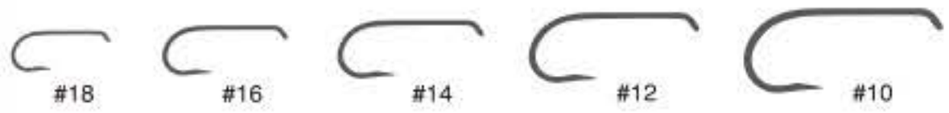

A versatile short-shank dry fly hook.Good for parachutes,thorax flies,mayfly emergers and CDC's when you want them to look smaller or sit high on the surface on their toes.

TMC900BL

Dry Fly, D/E, 1XF, 1X Wide, Semidropped Point, Barbless, Forged, Black.

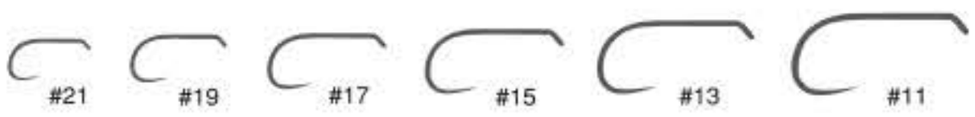

A barbless hook designed so that the point goes outward slightly and the throat is deep enough to hold the fish as well as a barbed model. The wire is strong enough to hold a big fish. The size range, sizes #8-#24, covers many different types of flies and fishing.

TMC103BL

Dry Fly, D/E, Wide gape, Extra fine wire, Barbless, Black.

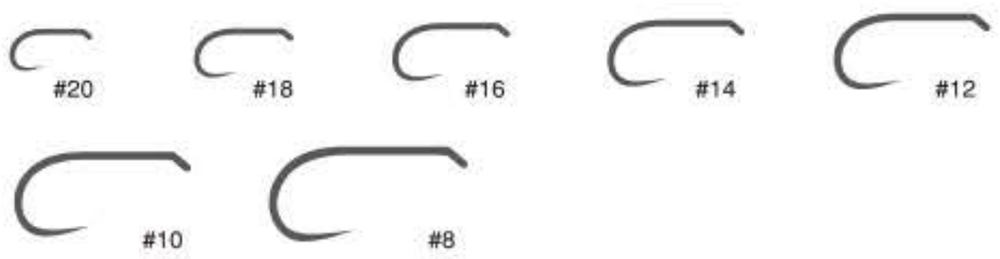

With its razor-sharp point and barbless design, this hook penetrates the fish's jaw quickly and holds securely. We find that many people are switching to barbless hooks not only easier releasing fish, but also because the barbless disign makes for a more secure hook-up with the fish. TMC 103BL is a versatile design and can be incorporated into dry flies, soft-hackle patterns, CDC flies and emergers with ease.

TMC113BLH

Nymph, D/E, 1XH, Barbless, Black.

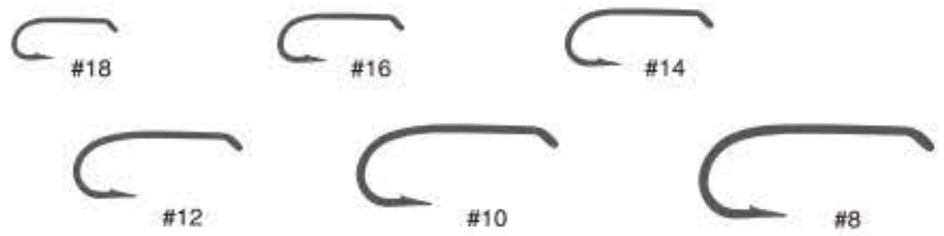

Heavier version of TMC103BL. TMC103BL has been very popular worldwide because of its superior hooking ability, but sometimes too fine to fish big trouts. This is it. Good for not only tying dry flies but nymphs now. Matt black finish.

TMC9300

Dry & Wet Fly, D/E,1X Heavy, Wide gape, Forged, Bronze.

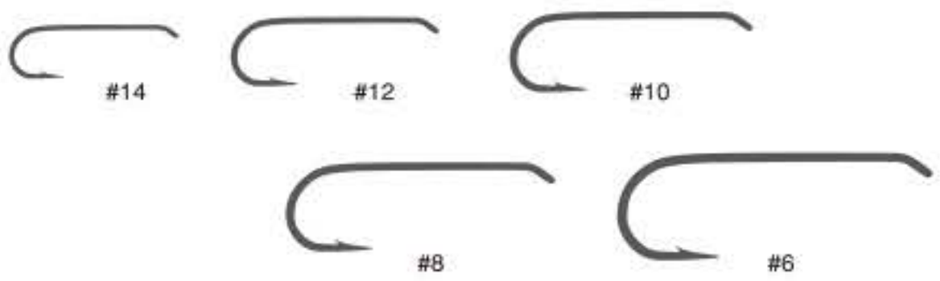

The best dry fly hook available for hair-wing patterns. The use of a little heavier wire than traditional dry fly hooks produces a hook that is tough enough to handle large trout in weedy stream or lake conditions. An exceptionally strong dry fly hook that is also the perfect choice for standard wets and soft hackle flies.

TMC5212

Hopper & Terrestrial, D/E ,2XL, 1XF, Perfect bend, Forged, Bronze.

A 2X-long dry fly hook based on the same design as our TMC 5262 nymph and streamer hook. The long shank makes it useful for imitating hoppers, adult stoneflies and caddis flies, as well as some of the largest mayfly duns.

TMC2312

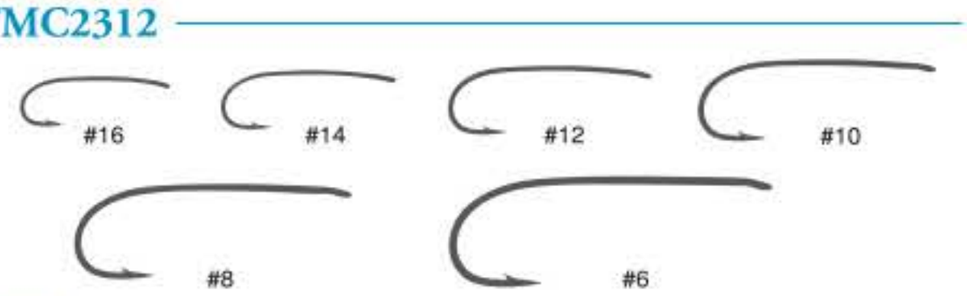

Hopper & Terrestrial, Straight eye, 2XL, 1XF, Slightly humped shank, Forged, Bronze.

TMC2302

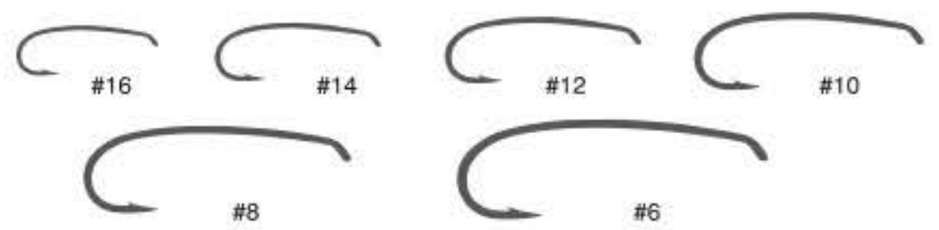

Terrestrial, D/E, 2XL, Standard wire, Slightly humped shank,Forged, Bronze.

A versatile design for stoneflies, caddis and hopper flies, as well as nymphs. It features a straight eye and slightly curved, 2X-long shank. The Wire is 1X-fine for enhanced floatation of a fly. TMC2302 has the same design as TMC 2312, except this hook has a down eye and uses standard wire for added strength.

TMC2312

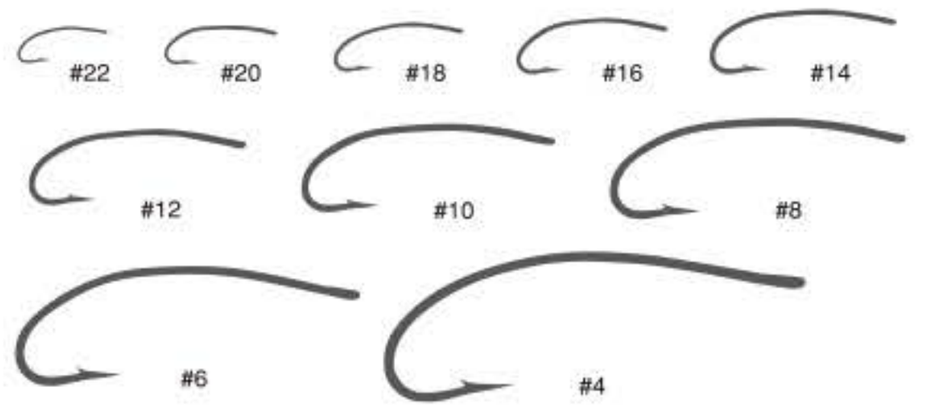

TMC2302

TMC200R

Nymph & Dry Fly, Straight eye, 3XL,Standard wire, Semidropped Point,Forged, Bronze.

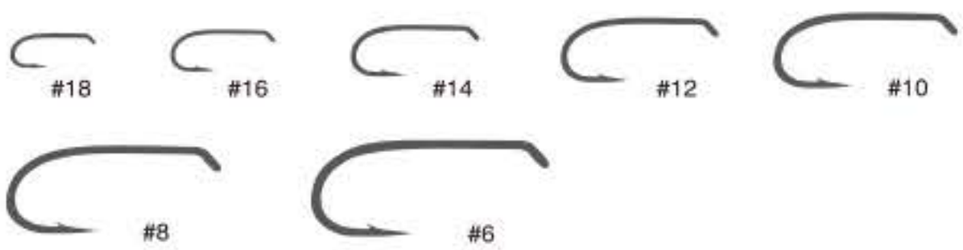

A straight-eye nymph and dry fly hook that incorporates a gradually sloping bend to better imitate curved insect bodies. Because this design is 3X-long with a sloping bend, the hook point is semi-dropped for better penetration and holding.

TMC3769

Wet Fly & Nymph, D/E, 2X Heavy, Sproat bend, Bronze.

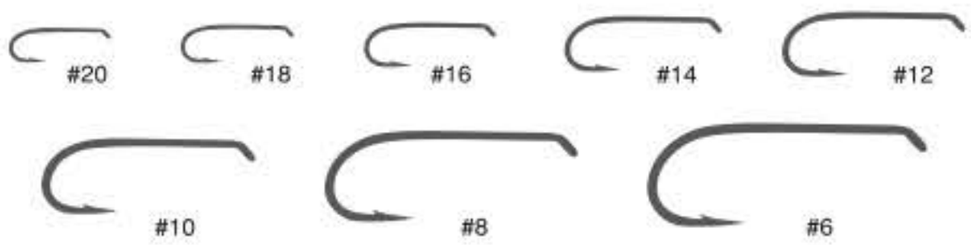

The standard down-eye hook for wet flies and nymphs. This model combines a sproat bend with 2X-heavy wire for added strength. A proven choice for many types of sub-surface flies.

TMC3761

Wet Fly & Nymph, D/E,1XL, 2X Heavy, Sproat bend, Bronze.

The same basic design as the TMC 3769, but this hook is 1X longer for tying more extended nymph patterns and is available in a wider size range, from sizes #6-#20.

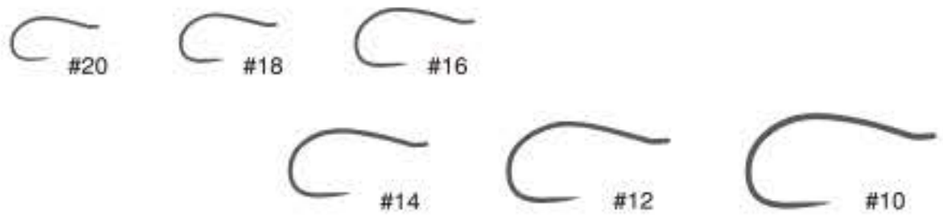

TMC FLY HOOK SERIES

TMC206BL

Caddis pupa & larva, Floating nymph, Emerger, Soft hackle,Parachute, Keel nymph, 2X Short, 1X~3X Variable fine, Curved shank, Barbless, Black.

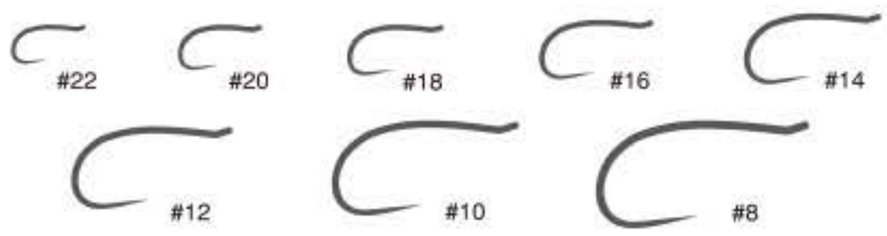

The eye is slightly up-turuned on this model.The shank, on the otherhand, curves gradually down towards the rear, which makes the hook ideally well-balanced.It rides in the water in the way as a straighteyed hook does. This is an excellent choice for caddis pupa imitations, floating nymphs, emergers, soft hackle flies, parachute dries, CDC dries, shrimp flies and many other patterns.

TMC226BL

Caddis pupa & larva, Floating nymph, Emerger, Soft Hackle, Keel nymph, Parachute, U/E, IXF, Organic bend, Barbless, Bronze.

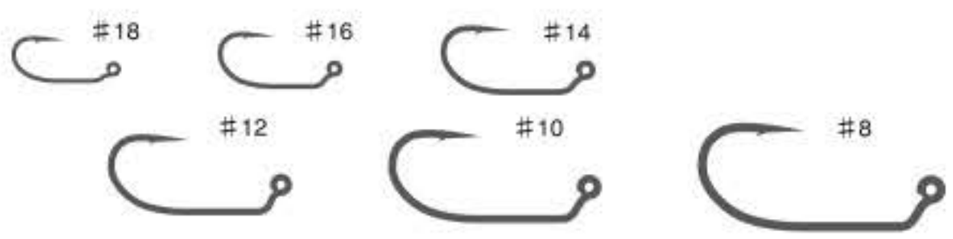

Heavier version of TMC206BL but still 1X fine dry fly hook. Fine tuned balance of shank and gape. Standard bronze finish. The legendary fly tyer Rene' Harrop were longing for.

TMC413J

Nymph, 40~60 degrees vertical eye, Wide gape, Medium wire, Small barb, Bronze.

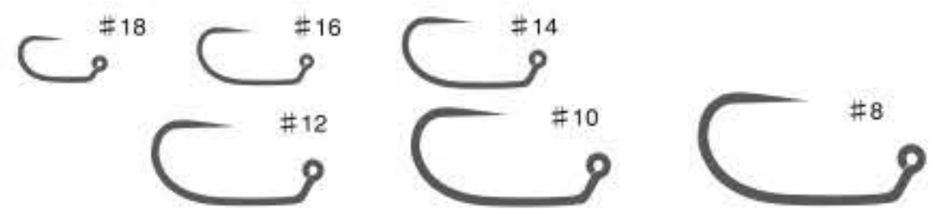

Versatile jig hook style for bead head nymph. Swims upside down and be snagless. Slightly longer than TMC403BLJ and with tiny barb. Available in up to size 18, which gives you more choices.

TMC403BLJ

Nymph, 60 degrees vertical eye, Wide gape, Medium wire, Super fine barbless point, Black nickel.

Jig hook style for bead head nymph. Swims upside down and be snagless. Great for Czech nymphing technique.

TMC708

Keel Streamer, Nymph, Dry Fly, Terrestrial, "Dolphin Shank", Micro Barb, 2X Heavy, 3XL~1.5XL Shank, 1X~2.5X Wide Gape, Forged, Bronze.

The balanced 40-degree bent shank contributes to have a keel fly profile. Variable gape and shank size for better hooking. Slightly-turned-up point for less snagging and more hooking ability. Good for big nymphs or dry flies as well.

TMC2487

Shrimp & Caddis pupa, D/E, 2X Wide, 2X Short, Fine wire, Bronze.

TMC2487BL

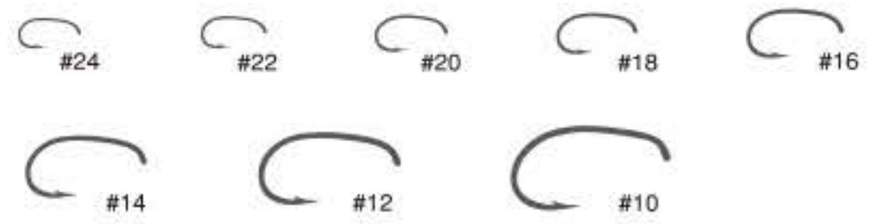

Floating nymph, Shrimp, Caddis pupa, D/E, 2X Wide, 2X Short, Fine wire, Barbless, Bronze.

TMC2457

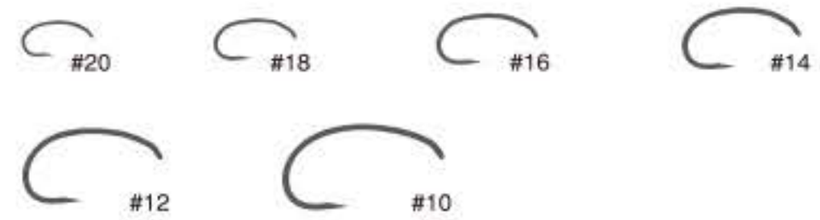

Shrimp & Caddis pupa, D/E, 2X Wide, 2X Short, 2X Heavy, Bronze.

The curved, fine-wire hook design is especially effective for shrimp, caddis pupae and other emerger imitations. This model is 2X short and 2X wide with the round gape for secure hooking on large fish. TMC2457 has the same design as TMC 2487, but with 2X-heavy wire for added strength. An exceptional hook for glo-bugs and other egg patterns.

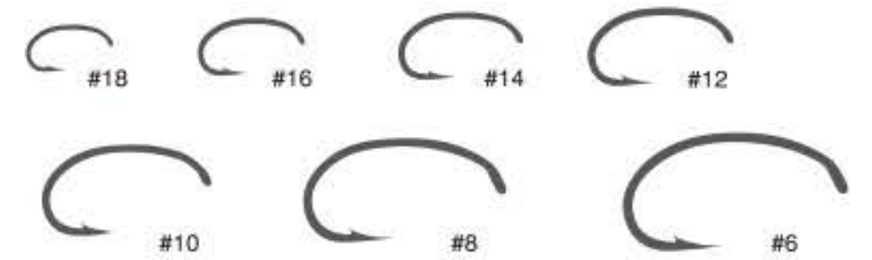

TMC2487

TMC2487BL

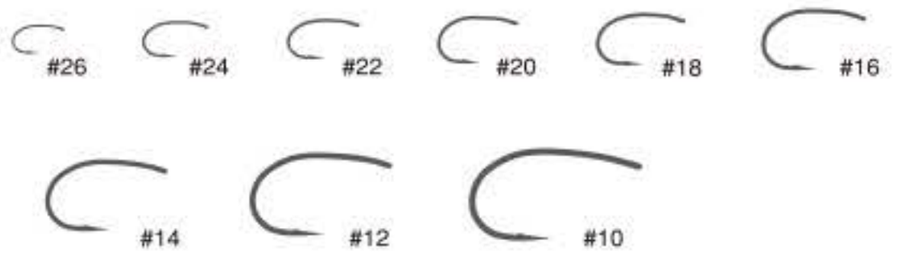

TMC2457

TMC2488

Dry Fly & Nymph, Straight eye, 3X Wide, 2X Short curved shank, Fine wire, Bronze.

A newly designed hook with a curved short shank. The straight-eye design provides a more open gape in the smaller sizes. More than just a straight-eye version of TMC2487, this hook is useful for a wide variety of small patterns.

TMC2488H

Dry Fly & Nymph, Straight eye, 3X Wide, 2X Short curved shank, 2X Heavy, Bronze.

Heavier wire version of one of the best selling hooks, TMC2488. After a few years in the US market, it is now one of the most sought-after hooks for big-trout fishermen. Strong enough to hold a big trout even on size 22.

TMC5262

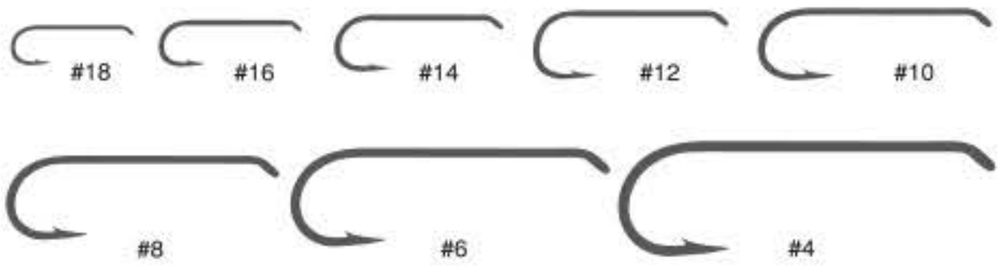

Nymph & Streamer, D/E, 2XL, 2X Heavy, Perfect bend, Forged, Bronze.

TMC5263

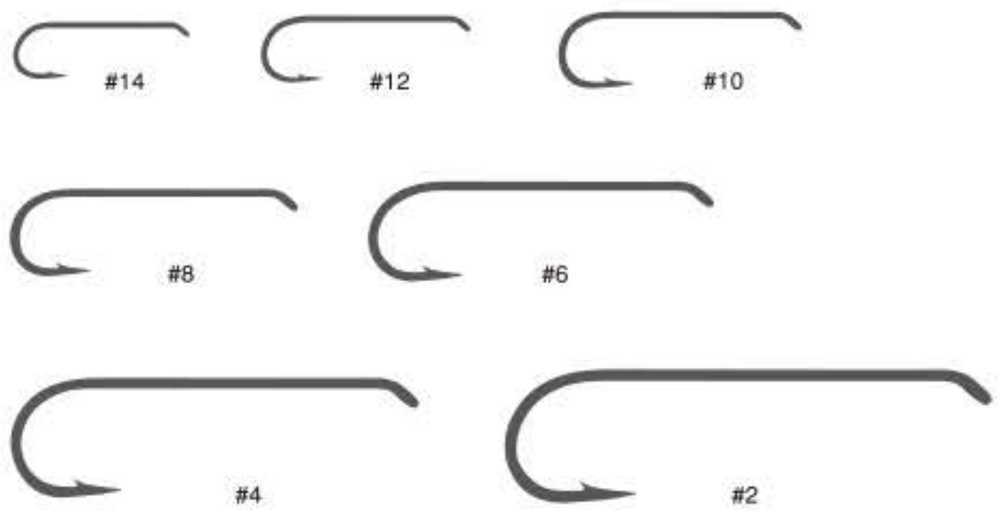

Nymph & Streamer, D/E, 3XL, 2X Heavy, Perfect bend, Forged, Bronze.

A versatile nymph and streamer hook that uses the TMC perfect bend for classic fly design. The shank is 2X long and uses 2X-heavy wire for added strength. This hook should be included in every fly tyer's basic selection of hooks. TMC5263 for additional length.

TMC5262

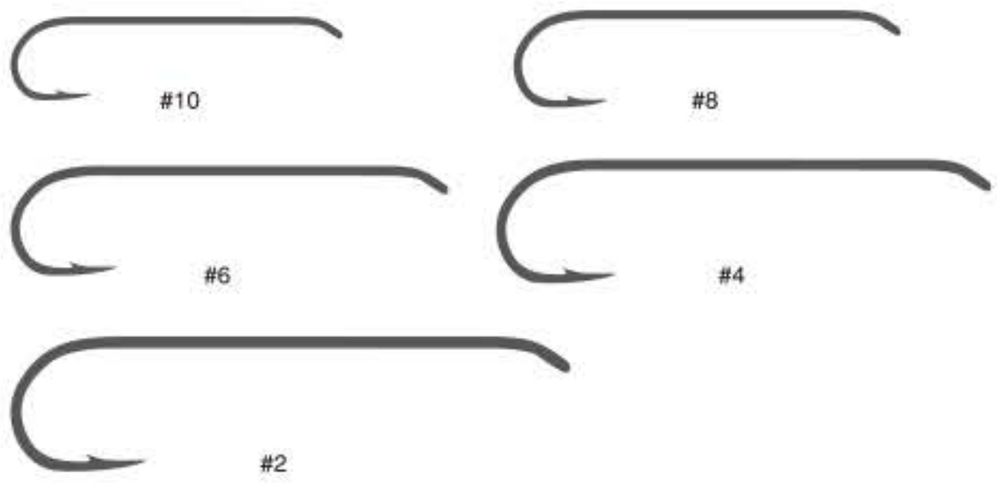

TMC5263

TMC300

Streamer, D/E, 6XL, Heavy wire, Forged, Bronze.

A down-eye streamer hook with 6X long shank. Good for many long-bodied classic streamer patterns.This model uses heavy wire to stand up to the large fish often hooked on this type of fly.

TMC105

Egg Fly & Glo Bug, Straight eye, 7X short, 2X Strong, Reversed Bend, Bronze.

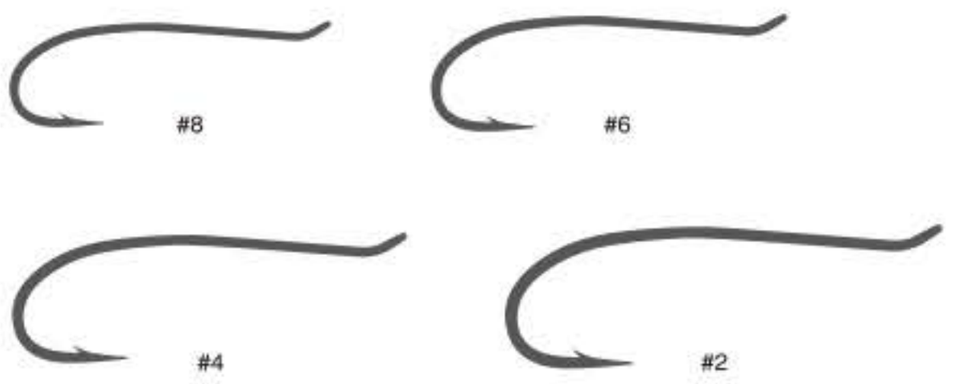

A model specially designed for egg flies or glo-bug flies for steelhead and salmon. Heavy wire is used in all sizes, from size 4/0 to #10, to stand up to the weight and fight of a steelhead fresh from the ocean.

TMC7999

Salmon/Steelhead Wet Fly, Up-turned tapered loop-eye, Heavy wire, Forged, Black.

An up-turned, tapered-loop eye design that has become the standard model for salmon and steelhead wet flies. It uses a heavy wire for added strength.

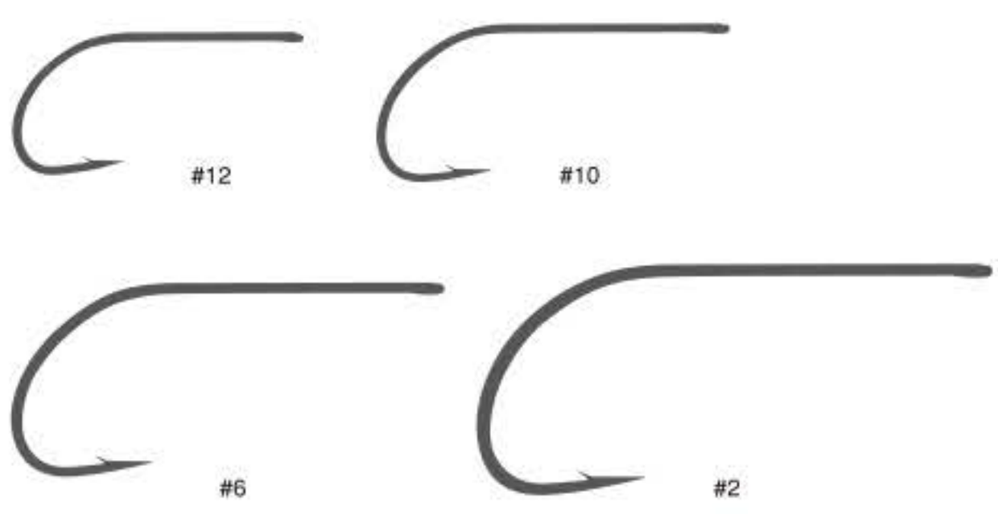

TMC8089

Bass Bug, Straight eye, Fine wire, Wide gape, Forged, Bronze.

TMC8089N

Nickel plated.

A specialized hook for tying bass bugs. The straight eye and wide gape are helpful for tying deer hair, an essential part of many bass patterns. The fine wire on this model helps keep patterns "floating like a cork." This model also available with a nickel finish. Ask for TMC 8089NP (nickel plate).

TMC FLY HOOK SERIES

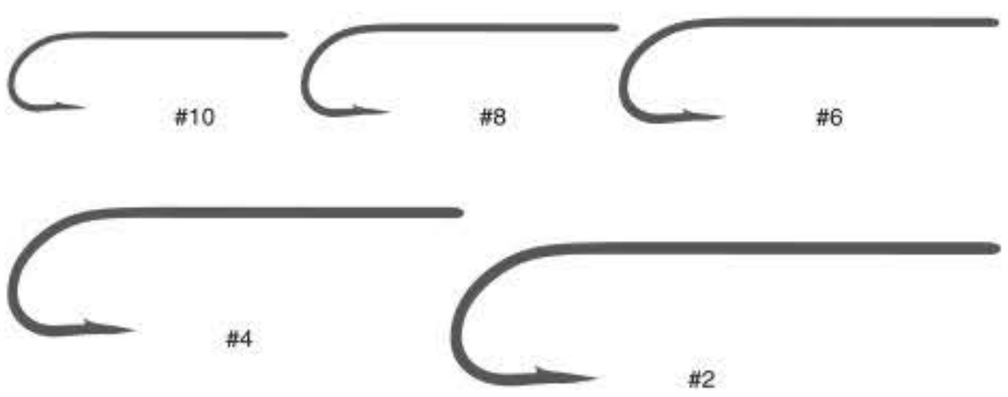

TMC9394

Streamer, Straight eye, 4XL, 3X Heavy, Nickel plated.

TMC9395

Bronze.

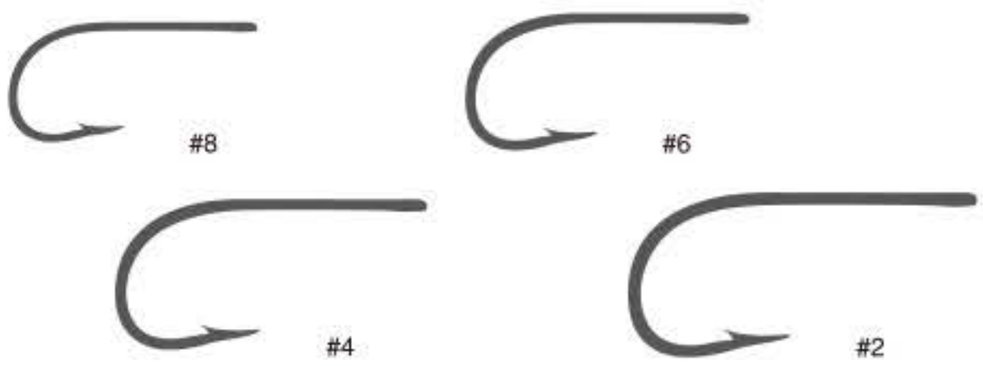

This heavy-wire model is plated with nickel, a corrosion-resistant finish suitable or saltwater, bass and streamer flies. For anglers who prefer a traditional bronze finish in the same design, we have TMC 9395.

TMC800S

Saltwater Fly, Straight eye, Heavy wire, Semidropped Point, Forged, Stainless.

A stainless steel, saltwater hook designed for use on everything from tarpon to bonefish. Due to the requirements of the manufacturing process and environmental consideration, our stainless hooks are not chemically sharpened. However, the points are just as sharp as our other models.

TMC811S

Saltwater Fly, Straight eye, Standard Length, Extra Strong, Forged, Stainless.

Designed as a basic stainless hook for saltwater fly fishing. This model covers a wide variety of saltwater flies and gamefish, with a particular emphasis on bonefish, permit and similar patterns.
